【図 8】

The image displays a medical software interface with several key components:

- Top Panel:** Patient information for 9999999, 太郎 (Taro), 1歳5ヶ月1日 (1 year 5 months 1 day).
- Left Panel (S2):** A grid of checkboxes for various symptoms and conditions, such as 小児BA+AR (Child BA+AR), アレルギー性鼻炎 (Allergic rhinitis), and 呼吸不全 (Respiratory distress).
- Center Panel (W1):** A physical exam diagram with handwritten notes in Japanese, including "呼吸不全/全身状態あまりよくない" (Respiratory distress/Overall condition not very good) and "体がどとちもかゆい" (Body is itchy everywhere).
- Right Panel (K):** A list of medical codes and procedures, including 呼吸不全 (Respiratory distress), 呼吸不全 (Respiratory distress), and 呼吸不全 (Respiratory distress).
- Bottom Panels (M):** Two windows for custom text templates (定型文・語句). The left window lists various medical scenarios and actions, such as "鑑別診断→検査" (Differential diagnosis → examination) and "診断名→治療方針" (Diagnosis name → treatment plan). The right window lists specific medical conditions and their corresponding actions, such as "異常なし" (No abnormality) and "Cold, Viral infec(含ES)" (Cold, Viral infection (including ES)).

Labels S2a, S2b, S2c, S2, W1a, W1b, W1c, W1d, W1e, W1f, W1g, W1h, W1i, W2, g4, W1, K1, K2, K3, and M are used to identify specific elements within the interface.
